

Real World Certifications for Digital Skills

Tosa certifications set the standard for digital skills certifications and are used by thousands of schools, training organizations and companies around the world. For over 10 years Tosa certifications have been offered to students, trainees, and employees to validate their proficiency on desktop and graphic design applications, digital literacy, cyber security and coding. Tosa certifications are industry aligned and globally recognized.

Why certify ?

Digital skills are essential for the jobs of today and tomorrow. Tosa certifications allow candidates to stand out in the job market.

All Tosa certified individuals receive a score out of 1,000 points to be shared on their resume or professional networks providing proof of their proficiency.

89%

of individuals with Tosa certifications say that it has helped them gain confidence in their skills.

+50%

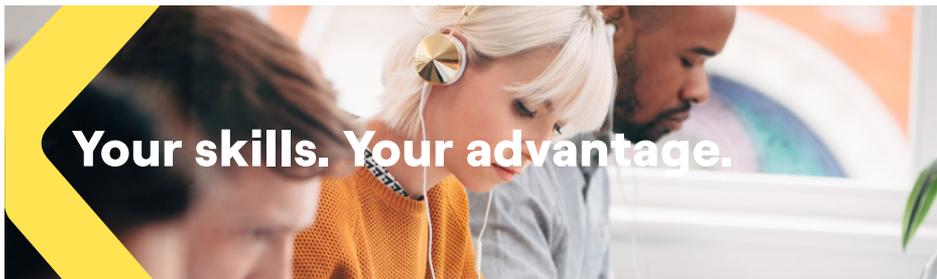

Tosa certified individuals believe that the certification is helpful for their career evolution

Tosa certifications: a unique experience

With several thousand questions available, Tosa tests provide a tailor-made experience to each candidate by selecting a unique set of questions that corresponds to their level. The questions are asked in the form of interactive activities, multiple choice questions, and real-life tasks to be carried out directly in the software environment.

Your skills. Your advantage.

Assessment

🕒 40–60 min 🎯 25–35Q

Certification

🕒 60–75 min 🎯 35–45Q

TOSAdesktop

Tosa Desktop covers desktop applications such as Microsoft Office and Google Workspace.

TOSAgraphics

Tosa Graphics covers creation and design applications such as Adobe and Autodesk.

TOSAdigital

Tosa Digital covers digital literacy, cyber security awareness, and digital collaboration.

TOSAcode

Tosa Code covers popular programming languages such as Python.

Flexible Proctored Environment

Our browser-based platform doesn't require any install, download, or update.

Tosa certifications must be taken in a proctored environment:

- In person: in the classroom and on a PC, Mac or Chromebook.
- Remotely: via our online proctoring solution.

Adaptive testing

Our technology adapts the difficulty level of the test according to the individual's answers to test the limitations of their skill and knowledge. The higher the level of the candidate is, the higher the difficulty of the questions and the score. Tosa eliminates failure as all candidates are certified, but at their own level of proficiency.

Detailed results

Use Tosa pre- and post- assessment tests to ensure that individuals are focused on skill acquisition, not test prep.

Comprehensive, easy-to-interpret skills reports are generated at the end of each test to help:

- identify an individual's skills and skill gaps,
- adapt course content to meet individual needs,
- measure the effectiveness of a program/course.
